25X1A	ı.	Comment. As compared with the last reported period, the total loading
		performance decreased slightly, except for 30 December 1952 where 4+
		exceeded a total of 30,000 cars for the first time. The number of cars loaded for the Soviet occupation forces corresponded to the relatively low figures

25X1A

2. Comment. These data supplement information contained in a previous report and in paragraph 1 of the present report, and break down the number of cars loaded for the Soviets and loaded with coal according to the eight railroad districts.
